

METAPHYSICS of GENDER:

Pro-Trans view: Falsely claims Biological Sex is different from Gender which is a mere "Human Construct." But the "Human Construct" is only their A Priori (custom-invented), fake, Chimera/Frankenstein-of-a-concept of Gender, not the traditional Binary concept of Gender, which is in fact A Posteriori (experienced, in nature).

 **Science** ✓ = 2 "Binary" Genders

"Human Constructs" = 100+ (Trans?) Genders

Aristotle,

...came up with a hierarchical pyramid of human nature:

- Higher levels **COME FROM** lower levels.
- Scientist studying higher levels have recourse to lowest levels, to study & learn things, with definitive accuracy.
- Things on lower levels **DEFINE** (Gender &) things on higher levels.

Arguments:

- Realism: As the arrows (at left) show, EVERYTHING comes from below, from DNA, as thus definitive.
- Essential argument: A few exceptions or alterations don't destroy the general integrity of the essence of 2 sexually binary genders.
- Extremism: Trans is only pushed because it's politically advantageous to neo-Marxism, which seeks to dismantle all big ideas.
- Fruits: Natural Law is healthier than Frankensteining.
